

Heated Outdoor Jacket

for work and leisure

For a perfect fit –

Pay attention to the following points:

- A Chest circumference:** Measure horizontally in the widest area of your chest.
Example: If your chest circumference measures in at 106 cm, pick a jacket with 114 cm chest circumference (always round up to the next bigger size).
Keep in mind that you might be wearing another couple of layers underneath the jacket, which might increase your actual chest circumference.
- B Back length:** Measure vertically from the neck to the coccyx.
- C Arm length:** Measure from the collar to the wrist.

GHJ 12+18V Professional Unisex

| Measurements of jacket | XS | S | M | L | XL | XXL | 3XL |
|------------------------------------|------|-----|-----|------|------|-----|-----|
